## Light & heavy duty

A choice of lath sections

## Cut to size

Punched to order

## Finishing options

Standard RAL colours

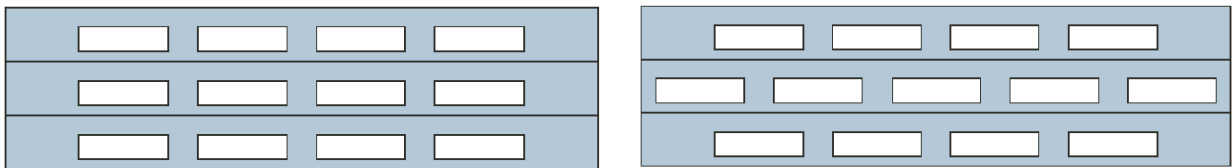

# Choose the section and punch pattern.

Light and heavy duty aluminium laths, cut to size and punched to order. Sections can be punched to accept standard end locks.

APPROXIMATE WEIGHT PER SQUARE METRE

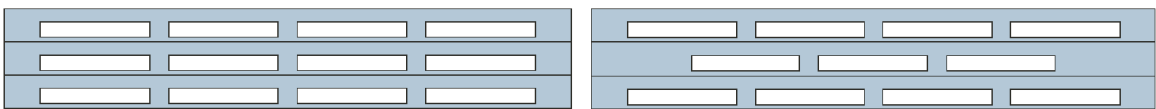

| Section | Solid | Punched | Punched<br>& glazed | Open area |
|---------|-------|---------|---------------------|-----------|
| MS129   | 7 kg  | 4.7 kg  | N/A                 | 33%       |
| MS126   | 7 kg  | 5.1 kg  | 6.5 kg              | 27%       |
| MS124   | 10 kg | 7.3 kg  | 8.7 kg              | 27%       |
| MS140   | 10 kg | N/A     | N/A                 | N/A       |

## MS124/126 single punch

150 × 41 mm. In line (left) or brickbond (right).

## MS124/126 double punch

290 × 41 mm, 25 mm gap, 40% open area. In line (left) or brickbond (right).

Drawings reproduced from the original technical sheet. The 40% figure applies to the double-punch option above; the table retains the source section values.

Also available: MS129 single punch, 100 × 25 mm. Ask about custom shapes, including company logos.

# Complete the specification.

Discuss stock lengths, components and finishing with our team, alongside your chosen lath and punch pattern.

---
